

CAMPUS COLLABORATION FINDER

Bridging the Gap Between Academic Ideas and High-Impact Execution

| THE FRAGMENTATION CRISIS

SILOED LEARNING

Students often work within rigid departmental boundaries, missing out on interdisciplinary perspectives that drive innovation.

INEFFICIENT DISCOVERY

Current methods (bulletin boards, mass emails) make finding the right skill sets for specific projects nearly impossible.

THE OPPORTUNITY COST

Research suggests that 60% of student-led projects fail to reach completion due to a lack of proper team cohesion and resource accessibility.

| THE UNIFIED SOLUTION

Campus Collaboration Finder is a centralized ecosystem designed to facilitate seamless project-based networking.

- ✓ Direct Skill-to-Need Matching
- ✓ Inter-departmental Visibility
- ✓ Secure Academic Authentication

| IMPACT POTENTIAL

85%

INNOVATION SURGE

DRIVING ACADEMIC EXCELLENCE

Statistics show that cross-functional teams generate nearly double the innovative output compared to homogeneous groups.

By reducing search time for collaborators by 40%, we empower students to focus on actual development and research.

SMART PROFILE MATCHING

Our intelligent profile system indexes student skills, academic history, and project interests to surface the best potential partners.

GRANULAR TAGGING

Search by specific technologies (Python, CAD), methodologies (Agile, Lab Research), or soft skills (Leadership, Design).

MyPrime

| THE COLLABORATION HUB

PROJECT REPOSITORY

Showcase ongoing work and past accomplishments to build institutional credibility.

ROLE ASSIGNMENT

Define specific team roles (Frontend, Researcher, Lead) to clarify expectations.

EVENT DISCOVERY

Sync with campus hackathons, workshops, and interdisciplinary seminars.

//

*"Alone we can do so little; together we
can do so much."*

— *Helen Keller*

DATABASE ARCHITECTURE

Module	Primary Entity	Core Relationships	Key Attribute
Authentication	Users	N/A	Academic Email
Project Management	Projects	User-to-Project	Completion Status
Skill Indexing	Skills	User-to-Skill	Expertise Level
Messaging	Chats	Team-to-Chat	Timestamp

| ROBUST TECH STACK

BACKEND: PYTHON FLASK

A lightweight, high-performance web framework ensuring rapid API response and secure routing logic.

DATABASE: MYSQL

Relational data structure for managing complex links between students, projects, and skills.

 Tech Stack

| THE USER JOURNEY

Registration

Verified sign-up via
campus credentials and
profile setup.

Skill Matching

Auto-surfacing of users
with complementary
abilities.

Discovery

Browsing active projects or
posting a new initiative.

Synergy

Forming the team and
commencing collaborative
work.

| FUTURE GROWTH ROADMAP

STRATEGIC EVOLUTION

Our focus is transitioning toward AI-driven predictive matching to suggest collaborators before students even know they need them.

QUESTIONS?

Let's Build the Future of Academic Synergy Together.
